The following list contains the decisions taken by the Harmonized System Committee (**77th Session – March 2026**) concerning amendments to the Harmonized System Compendium of Classification Opinions, applicable as of 1 June 2026. This publication will be updated regularly.

The Harmonized System Compendium of Classification Opinions (FIFTH EDITION **2022**) is published by WCO and consists of a numerical list, set out in the order of headings and subheadings of the Harmonized Commodity Description and Coding System, of the Classification Opinions adopted by WCO. Within any Harmonized System heading or subheading the Classification Opinions are listed in chronological order. The Compendium is available as a bilingual publication in English and French, the two official languages of the WCO, and can be ordered directly (see "Online Services" > "Bookshop" on this Web site).

The amendments listed below are reproduced in the order of the current pages concerned and will be incorporated into the aforementioned WCO publication in due time by replacing the pages affected by the amendments made.

Advice
Parties seeking to import or export merchandise covered by a decision are advised to verify the implementation of the decision by the importing or exporting country, as the case may be.

French version only.

Page IV/20.

Insert the following Classification Opinion :

"**2103.10** **1.** **Mushroom-flavoured soya sauce**, in liquid form, composed of the following ingredients by weight: water (53.08 %), salt (18.50 %), colouring (caramel E150a) (11.10 %), soya (8.70 %), other additives (5.61 %), wheat (3.00 %) and mushroom extract (0.01 %).

Application of GIRs 1 and 6".

Page V/8.

Insert the following Classification Opinion :

"**2715.00** **3.** **Polymer-modified petroleum bitumen mixture**, intended for use as a binder in the construction and repair of road surfaces. It is a macroscopically homogeneous mixture consisting of petroleum bitumen (94.0 – 95.6 %), styrene-butadiene-styrene (SBS) rubbers and/or a mixture of copolymers of ethylene, butyl acrylate and glycyl methacrylate (4.4 – 6.0 %).

Application of GIR 1.".

Page VII/5.

Insert the following Classification Opinion :

"**3920.49** **1.** **Non-cellular poly(vinyl chloride) (PVC) decor film** containing plasticiser, of a thickness of 0.07 mm and dimensions of 1580 x 1000 mm, printed with patterns imitating the appearance of wood. This product is non-self-adhesive. It consists of 84 % PVC, 1 % plasticiser (dioctyl terephthalate) and 15 % colouring matter.

It is intended for use as decor film in the production of floor coverings.

Application of GIR 1 and 6.

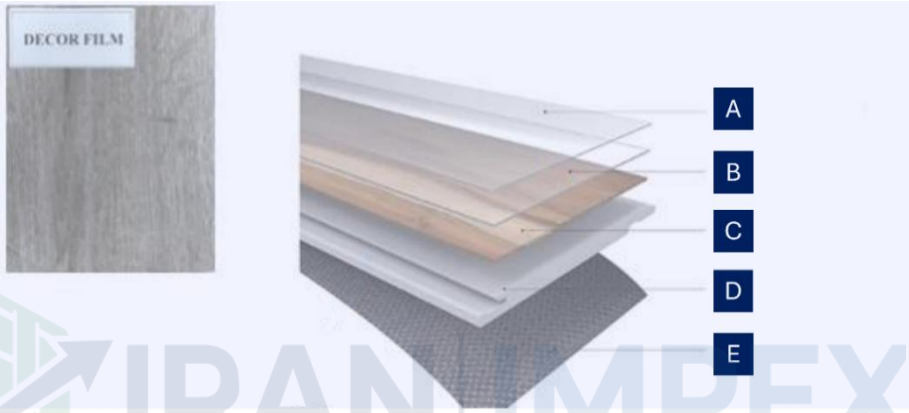

Illustration of the floor covering with the integrated film.

A: UV coating layer
B: Wear layer
C: PVC decor film
D: Core layer
E: Base layer".

"**6307.90** **9.** **Made up swaddles**, of textiles, with hemmed edges, measuring 70 x 70 cm, used as a security blanket, a bib or as protection for a baby.

Application of GIRs 1 and 6.

See also Opinions 9619.00/1 and 9619.00/2.

".

Page XX/30.

Insert the following Classification Opinions:

"9619.00 **1.** **Washable napkin (diaper)**, consisting of an outer wrap of polyurethane laminate (PUL) fabric and ten absorbent inserts of bamboo-based textile material. The protective outer wrap has snap-fasteners for securing the insert.

The inserts are washable, while the outer wrap is intended for repeated use before washing.

Application of GIR 1.

See also Opinions 6307.90/9 and 9619.00/2.

9619.00 **2.** **Washable insert for napkin (diaper)**, consisting of two outer layers of bamboo-based textile material and of two inner layers of microfibres.

Application of GIR 1.

See also Opinions 6307.90/9 and 9619.00/1.

".

Page XV/1b.

Insert the following Classification Opinions :

"**7223.00** **1.** **Cold-formed stainless steel product** with a uniform solid cross-section, measuring 6.27 mm in width and 0.45 mm in thickness. It is formed from solid circular cross-section wire, cold-rolled between two rollers arranged on the top and bottom sides.

The product is coiled alternately from left to right and from right to left on a drum, across the full width of the drum, which significantly exceeds that of the product.

Application of GIR 1 (Notes 1 (e) and 1 (o) to Chapter 72).

See also Opinion 7223.00/2.

7223.00 **2.** **Cold-formed stainless steel product** with a uniform solid cross-section, measuring 3.00 mm in width and 0.96 mm in thickness. It is formed from solid circular cross-section wire, cold-rolled using four rollers arranged on the top, bottom, left and right sides.

The product is coiled alternately from left to right and from right to left on a drum, across the full width of the drum, which significantly exceeds that of the product.

Application of GIR 1 (Notes 1 (e) and 1 (o) to Chapter 72).

See also Opinion 7223.00/1.".

Page XVI/87.

Insert the following Classification Opinion :

"**8517.79** **6.** **Remote radio unit (RRU)**, designed to be used with a digital unit (DU) and an antenna in a cellular network base station.

The RRU is composed of a transceiver board, an amplifier and a filter.

- Transceiver board : under the control of the DU, it only converts analogue signals into digital signals and digital signals into analogue signals, and converts signals between radio frequency (RF) and baseband;
- Amplifier : it expands the effective range of the antenna by amplifying RF signals;
- Filter : it removes noise to provide the RF characteristics required for the DU and the antenna.

For the cellular wireless communication function of a base station, the RRU receives scheduling and synchronisation signals from the DU, and then converts them into RF signals according to the relevant RF band through RF filtering and amplification. The RRU itself cannot independently transmit or receive signals without control from the DU within a network and is not compatible with other communication apparatus.

Application of GIRs 1 (Note 2 (b) to Section XVI) and 6.".

Page XVI/116.

Insert the following Classification Opinion :

"**8536.69** **2.** **Multiple socket adaptor** consisting of four sockets, an on/off switch and a plug installed in a shared housing. The device, designed for a voltage not exceeding 1,000 volts, is used for simultaneous connection of multiple electrical appliances.

Application of GIRs 1, 3 (c) and 6.

See also Opinions 8544.42/1, 8544.42/2 and 8544.42/3.
